PRODUCT INFORMATION

Product Name	MWI SERVICE FOR EXCHANGE 2007	Company Name	MWI2007 - GOMANT
Current Version	1.9.4.0	IGR Version	1.9.4.0
Domain locked	GOMANT.COM	Licensed to	GOMANT VALLALAT
License expires	12/31/2025	Number of users	10000
Support expires	1/1/2026	Support type	1 (SUPPORT TYPE 0-NONE, 1-TIER-1, 2-TIER-2, 3-TIER-3, 4-TIER-4)
Email Address	SOFTWARE@GOMANT.COM	Current SMS balance	0.38
Current State	RUNNING	State Since	05/20/08 8:05:57 PM
Memory Usage	76 MB	CPU Usage	3 %
Host Name	EICH-H2	Uptime	1 DAY 18:22:40
MSR users	64	MWI users	60
MSR OFF	175	MWI ON	34
Messages sent	202	SMS sent	21

MWI 2007 - Geomant's latest application extends and enhances Microsoft's Exchange Server 2007 Unified Messaging solution with Message Waiting Indicator (MWI) and SMS text messaging capabilities.

Whether at their desk or on the move, Geomant's MWI 2007 solution immediately notifies a user that they have received a voice message from either their desk line or their cellular phone by lighting the lamp on their desktop phone and by sending an SMS text message to any SMTP enabled device.

Features

- Administration
 - MWI Service
 - MWI Users
- Configuration
 - Status Engine
 - Active Directory
 - Exchange Server
 - SIP Gateway
 - SMS Gateway
 - Mapping Rules
- Information
 - License
- Real-time Report
 - Mail notification
 - MWI change
 - MWI synch
 - Autodiscovery
 - Computer Usage
- Historical Report
 - SMS Sent
 - Email Sent
 - Lamp Switched
- Troubleshooting
 - PBX Access
 - GSM Access
 - Alarms Raised
 - Event History
 - Online Help

- **Notification:** instant notification of a voicemail, missed call or fax through the user's choice of media.
- **Compatible:** Designed for, and fully compatible with Microsoft's Exchange 2007 and Unified Messaging products. Interfaces directly with **Microsoft Active Directory** and Microsoft Exchange Unified Messaging servers.
- Lights the '**Message Waiting Indicator**' on a user's desk-phone when a voice message is received.
- Sends an **SMS text message** to a user's mobile phone indicating that there is a voicemail, fax or missed call.
- **Mobile Integration:** Facilitates the unification of office and mobile voicemail. Dials a user's mobile phone to play voicemail.
- **Fully Configurable** – to meet corporate requirements and individual notification preferences.
- Simple, intuitive **web-based administration**.
- **Automated installer:** simplifies the deployment process.
- **Statistics & Log Viewer:** Audit trail and problem resolution facility.
- **Multi extension support** – individual users can monitor multiple extensions.
- **Geomant SMS Centre:** cost effective 'pay as you go' web service for sending outbound SMS text messages without the need for a dedicated SMS gateway.

Proven Technology

- The first and most popular MWI solution in the world. Available since 2006.
- Developed and tested with support from Microsoft and gateway manufacturers Dialogic and AudioCodes. Compatible with most telephony platforms including Nortel, Avaya, Mitel, SipX and Cisco.
- Used by thousands of Microsoft Unified Messaging users across the globe.
- No requirement for additional servers – can co-locate on existing infrastructure.
- Flexible and scalable.
- The only solution to offer SMS notification without additional infrastructure or software.

Availability

Geomant MWI20007 is available through resellers or direct from Geomant UK Limited.

Geomant UK Limited
The Grange, 37 Alcester Road
Studley, Warwickshire
B80 7EG. UK.

www.geomant.com

System Requirements

- Works with all Unified Messaging compatible telephony systems with message wait functionality – both IP-PBXs and those connected through SIP-PSTN Gateways.
- Requires Windows Server 2003 SP1.

Architecture

MWI2007 interrogates Active Directory to determine which users are UM-enabled. It monitors their Voicemail, Missed Calls and Fax search folders. It subscribes to changes on these folders and sends MWI messages to the PBX via UDP of TCP protocol. It also initiates SMS Text messages to users if configured to do so. The Microsoft Exchange connector supports WebDAV and Web Service connections; user authentications with SMTP, SID or UPN; direct mailbox access or impersonate access modes.
