

Instant Awareness. Informed Action.
Packaged for ease of sale and delivery.

Geomant provides real-time and historical dashboards for management, agent desktops, and contact center wallboards.

Geomant Wallboard Packages provide an easy way to promote add-on business for your projects, complete with services and subscription pricing.

Value to Geomant Partner:

- Stand out from your competition by including value-added real time reporting.
- Increase recurring revenue by including performance management solution packages.
- Take advantage of a short sales cycle and fast implementation to quickly provide additional revenue.
- Expand and strengthen your presence at the customer site, opening doors to additional buying influences.
- The solution is sticky and expandable, helping to gain add-on sites and avoid displacement.

Value to End User:

- Help contact centers improve customer service by giving managers visibility into how the business is performing in real-time.
- Provide agents with the tools they need to monitor activity and alert on KPIs that are relevant to them.
- Include motivational messages for employees as well as the ability to add Social media feeds, RSS feeds, live video and data from popular tools including PowerBI and Google Sheets.
- The solution can be deployed as in-center wallboards, agent desktops or management dashboards.

Simplified pricing allows for quick quoting. Include it in your Managed Services offering!

Engage the Geomant Sales Team for demo assistance or any requirements outside the scope of the packages.
